

## **Stereofuse**

### **Biographie**

Thorsten was born in Hanau, near Frankfurt am Main, Germany. He acknowledged his fascination while being quite young, regarding club culture and the inherent lifestyle.

At the age of 15 Thorsten managed to explore turntables for the first time, side by side with his will to organise smaller events. Generally speaking, Thorsten has always been a music-fascinated kind of person and an open-minded and tolerant for any sort kind of influences or style - he created his own sound style as years passed by.

The first really important gigs in clubs and bars followed that style acquisition, and short-time residencies in diverse local clubs reflected an increasing acceptance of his music.

To increase temptation and fun according to electronic club music, he has created the project "Stereofuse" in 2002, together with his friend Martin Woerner. During this period both sides could mix up their experience from earlier productions and skills in Dj'ing. After a few months and a lot of endless night sessions, a superb collection of different tracks had been created at the top level. Based on these productions, they have sent the first demo cds away to several labels. This was successful. So in 2003 the first official release on the label "SALO Records" from Berlin came into reality, under the name "Casino EP". The 4-track EP has sold a good number of copies and quickly hyped the DJ-charts and playlists of famous DJ's.
